

Hytera Receiving Talker Alias

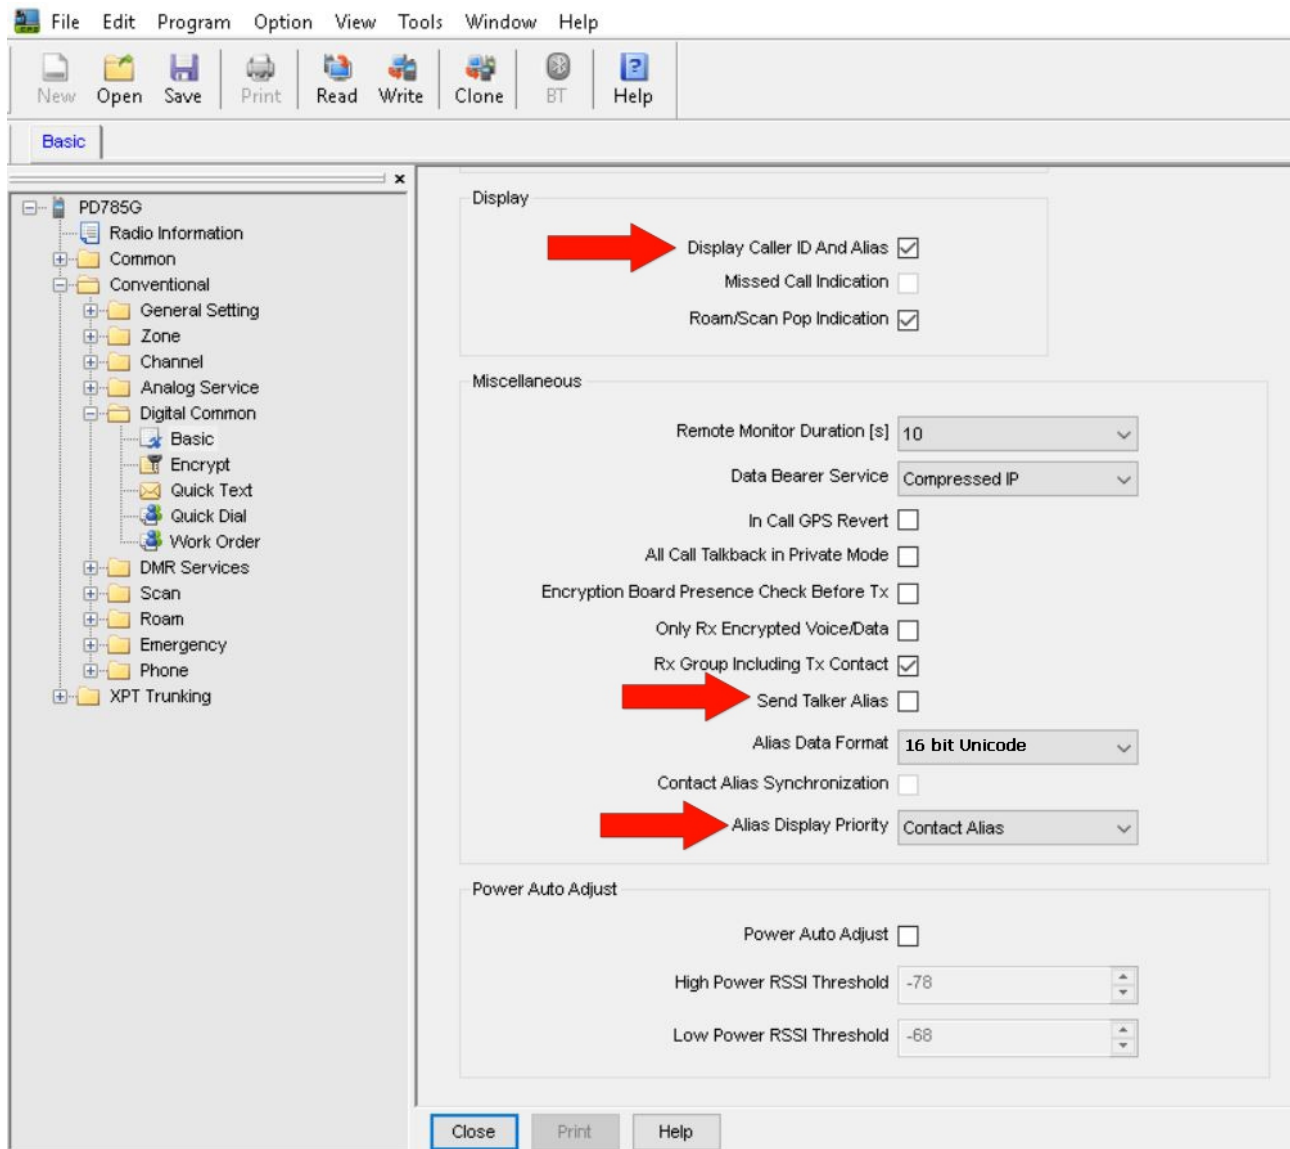

1st Setup the radio - Under - Conventional – Digital Common – Basic

Tick – Display Caller ID and Alias

Untick – Send Talker Alias (*Not required as BM sends your Callsign now*)

If you do tick this box your radio will send its own Alias ID

Alias Display Priority – Set to Contact Alias

2nd go to SelfCare and log in

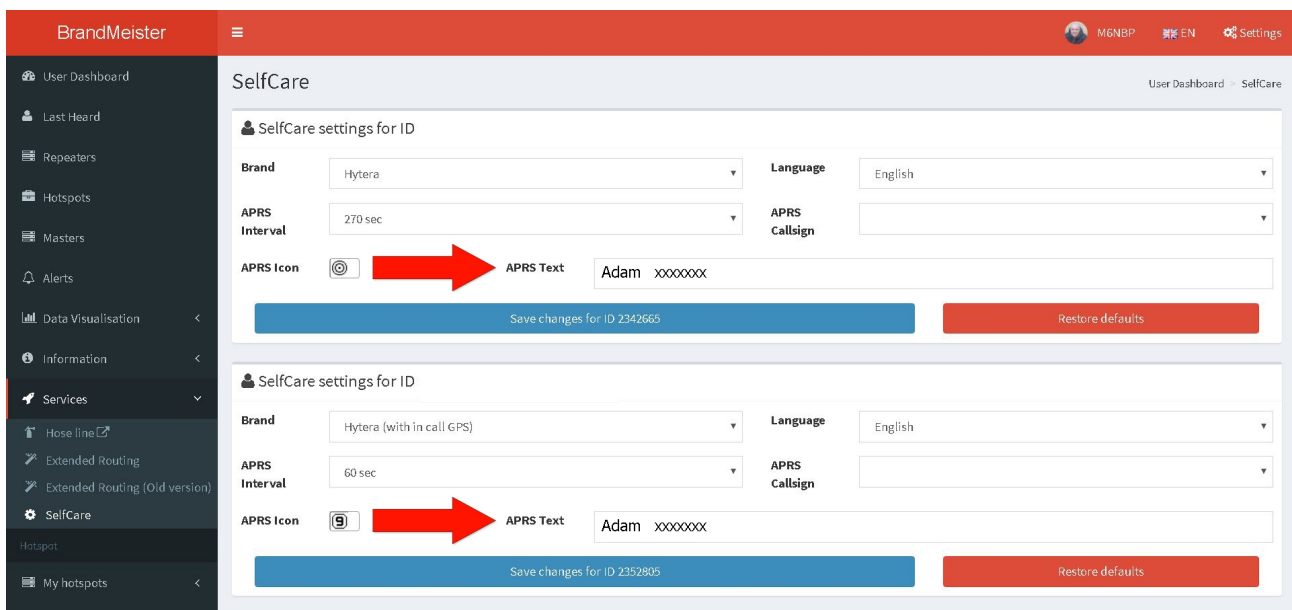

<https://brandmeister.network/?page=selfcare>

All we need to do is change the APRS Text

Most common is

Your First name (Adam) followed by your 7dig ID xxxxxxx

You can enter up to 20 characters on this line.

The screenshot displays the BrandMeister SelfCare interface. The top navigation bar includes the BrandMeister logo, a menu icon, and user information (MGNBP, EN, Settings). The left sidebar lists various system components: User Dashboard, Last Heard, Repeaters, Hotspots, Masters, Alerts, Data Visualisation, Information, Services, Hose line, Extended Routing, Extended Routing (Old version), SelfCare, Hotspot, and My hotspots. The main content area is titled 'SelfCare' and shows settings for two different IDs. The first ID (2342665) has Brand 'Hytera', Language 'English', APRS Interval '270 sec', and APRS Text 'Adam xxxxxxx'. The second ID (2352805) has Brand 'Hytera (with in call GPS)', Language 'English', APRS Interval '60 sec', and APRS Text 'Adam xxxxxxx'. Red arrows point to the APRS Text input fields in both sections. Each section includes 'Save changes for ID' and 'Restore defaults' buttons.

Does not work (yet)

Motorola Repeaters (possible, but it has issues with decoding audio streams)

Does not work (no possibilities)

c-Bridge CC-CC Link (protocol limitation)

RadioActivity KAIROS (protocol limitation)

DV4*
